Modern business is diversified.
Investors they prefer to invest in different assets.
For this there are holdings, joint-stock companies.
It is not always convenient to manage such structures.
Huge number of legal entities, heterogeneous assets-management
such education is very expensive.
Require it the presence of a number of legal entities, money transfers.
Using one of the types of business the client may not always take advantage of a byproduct.

MainCoin — is a digital coin that allows you to decide one of the most important problems of diversified business – creation of an ecosystem that would allow to create a single means of payment and would attract investment for so that business could develop.

MainCoin — is the world’s first digital currency for create and pay for services that are in one ecosystem.
Ecosystem

Our goal is to create a digital coin that offers a unique solution to the scalability for the business.

MainCoin is a digital currency that provides online and offline instant and private payments, as well as participates in various business processes as a means of payment.

The system is based on the Ethereum blockchain, which provides secure and reliable transactions.

Your personal information as well as digital assets protected and cannot be accessed by third parties.

MainCoin has its own cryptocurrency wallet, which already allows coin holders to store their coins and use them for everyday payments.

MainCoin is a unique token that can be used in any part of a vast ecosystem.

Having an extensive ecosystem will provide the best possible liquidity of MainCoin, and features of blockchain technology add to liquidity an incredible level of transparency and clarity for investors around the world.
MainCoin is notable that all the offered products built not only on the model of the developed business, but so and the models are working their ecosystem.

That is, all issued tokens not only have potential growth, but now fully provided with the resources of its ecosystems. The structure of the ecosystem includes:

Avtomain taxi is a taxi that works with everyone the parties on the principle of Informatization of services and provision of service's.

Avtomain taxi is wholly owned maincoin.money.

The business has been operating for more than 20 years, which means its model is stable and has the potential to expand. The peculiarity of the taxi is the utmost openness – the client sees all the machines in the search, the Manager sees all correspondence with the driver, and the driver immediately sees the entire route and has the ability to communicate openly with the driver and passenger.
Avtomain Bestchange — is an exchanger of digital currencies and Fiat money for cryptocurrency.

Also, the exchanger can operate as an independent a platform for the exchange of currencies and crypto-currencies between each other.

MNC Exchange is a high-tech center in that all trading operations are carried out on the basis of modern computer software based on the latest technologies solutions in the field of information technology.

All transactions will be paid in the MainCoin coin.
AVTOMAIN TRADING is online currency trading and cryptocurrency between users at market price.

A special feature of the platform will be the payment for any transactions in the coin MainCoin on the principle of P2P, as well as with the ability to instantly purchase without registration.
**MAIN CASH Money** is a system of payments between financial organizations, business organizations and Internet Users.

**MAIN RADIO** is a multimedia asset of maincoin.money
Business opportunity

**Scalability.**

Every business needs not only to be developed, but also contribute to the, to his filled with new content.

This may be an increase in volumes, optimization of business processes or growth in another area, not always adjacent.

For business growth it is necessary to use tools scalings.

They allow you to implement large projects in a short time. This opportunity provides **MainCoin**.
Mission Maincoin

Mission **Maincoin** - to create a universal currency for any business’s.

A business cannot grow, if not accelerate its development and minimize the cost of scaling it.

If we consider this aspect, the possibility of reducing response time to business processes in traditional areas business-can give a significant increase in economic development that will allow in any conditions to undertake economic action anywhere in the world.
The token and the factors of its growth

The **MainCoin** token is provided by a number of real parameters business's.

Forecasts for the growth of the token price are based on analysis of similar projects that have been developed and conducted a series of ICO.

In this regard, we expect the growth of the token standard formula.

In the first case, the token can be a working capital on the exchange:

Given that the number of tokens is limited and not assumes growth in geometric progression and public turnover on the exchange, then the value of the token may vary from nominal value to values, exceeding its 5-fold cost.
The second case is the token’s participation in the business as a payment one means.

Since tokens are involved in the turnover of real business, and business can be used as a platform for scaling and ecosystem development, it is worth noting that the growth token in ecobudget is associated with the growth of key indicators business that can bring additional income through increase the exchange value of the token.
Model ICO

ICO of the company is expected in several stages.
Coin standard-ERC20

Total issue 5,000,000,000 tokens.
